This workshop is designed to provide training in the Green Industries Best Management Practices (GI-BMP) for anyone working in the lawn, landscape, pest control, or municipal grounds areas. The Best Management Practices are focused on reducing non-point source pollution resulting from fertilization or pesticide application. At the end of this training you will be given a post-test to determine knowledge learned. If the post-test is successfully completed, you will be mailed a certificate of completion. Some cities & counties require this certification before you can bid on jobs or have commercial customers. Be sure to turn in your post-test, your evaluation, by the end of the day. If you also need pesticide CEUs, get your signed CEU attendance form before you leave.

8:15 am     Introduction and Pre-test

8:45-9:35  Module 1. Overview
History, Background & Overview of the BMP Program & Local Ordinances.
